MEMORANDUM FOR THE SECRETARY OF DEFENSE

SUBJECT: Special Intelligence Support Relating to the  
Kidnapping of BG Dozier - INFORMATION MEMORANDUM (S)

(S/NOFORN) The Defense Intelligence Agency and the U.S. Army  
Intelligence and Security Command (INSCOM) have recently  
provided information to U.S. and Italian authorities to aid  
in their search for BG James L. Dozier.

(S/NOFORN) This data was provided by message (Enclosures 1 and  
2) and data package (Enclosure 3) to U.S. authorities for dis-  
creet release to Italian officials with no source attribution  
given. The source of data was from both a DIA and U.S. Army  
INSCOM jointly funded effort known as Project [REDACTED].  
This effort was established in FY 81 and involves the use of  
the ability of certain individuals to mentally collect data  
at a distance. Although this project is still in the experi-  
mental stages, sources of mentally derived data have been [REDACTED]  
useful at times in past operational experiments.

(S/NOFORN) We can not at this time attest to the method's  
accuracy or usefulness of the derived data. However, it is  
hoped that information provided may be helpful in narrowing  
down search possibilities and will aid in the ultimate location  
of BG Dozier.

Coordination within OSD is not required.

SUBJECT Special Intelligence Support Relating to the Kidnapping of  
BG Dozier - INFORMATION MEMORANDUM (S)

**REMARKS**

**REMARKS**

1. (S/NOFORN) PURPOSE: To inform the Secretary of Defense of DIA and U.S. Army INSCOM joint effort in providing [REDACTED] derived data to aid U.S. and Italian authorities in search for BG James L. Dozier.
2. (S/NOFORN) BACKGROUND: On 18 December 1981 DT was requested by COL C.F. Scanlon, the Deputy Chief of Staff Operations, Intelligence and Threat Analysis Center, INSCOM to assist in providing [REDACTED] derived data to U.S. authorities in Europe concerning the search for BG Dozier. SRI International was contacted on the afternoon of the 18th and they immediately started on the problem. The resulting information was passed in portions over the weekend to DT. In consideration of the perishability of the derived data, DT then passed the information as received to the NMIC for immediate message (Encl one opposite) transmittal to U.S. and Italian authorities in Europe. On the 21st of December the final portions of the information were received from SRI International. The next day DT and INSCOM personnel drafted a message (Encl two opposite) and data package (Encl three opposite) consisting of combined DIA/INSCOM data. This combined data was then passed to the 584th MI Detachment in Vincenza, Italy and to JSOC for their use.
3. (S/NOFORN) DISCUSSION: Although we have not received any feedback on the accuracy or usefulness of the forwarded data, we believe the Secretary of Defense should be informed of the efforts and capabilities of the GRILL FLAME project in the Dozier case, and in future situations where these methods may prove to be helpful.
4. (U) RECOMMENDATION: Recommend you sign the Memorandum.
